

ROCKET

Introducing the Boxer Rocket – the ultimate electric cargo trike.....

It's fun time! The Boxer Rocket is undoubtedly the world's best looking cargo trike, and has even been voted into the world's top 10 most beautiful bikes of 2015. The Rocket presents a unique travelling experience for you and your children that will leave lasting happy memories. The Rocket is not all about good looks; underneath its art deco exterior is some highly innovative engineering which makes the Rocket one of the safest cargo trikes on the road.

100% UK designed and built – and built tough....

Like all Boxer trikes, the Rocket is built tough with laser cut aluminium construction throughout. The Rocket's unique 'aerospace girder' rear frame has been designed to be stronger than tube of the same weight and prevents the flex commonly found in cargo trike frames.

The Rocket has three locking hydraulic disc brakes which can be used as a handbrake to prevent the trike rolling away on hills. These brakes also bring the Rocket to a rapid stop even in wet weather. With its 250W motor fitted as standard and the addition of a 42 front to 34 tooth rear crawler gear, the Rocket can ascend steeper hills with the rider still on-board.

ROCKET

Class leading safety innovations

Boxer's much revered 12 Volt safety light set is included as standard. This provides the trike with vehicle strength LED headlights, front and rear turn-signal indicators, stop/tail lights and a loud horn – all controllable from a single handlebar mounted cluster switch. With this feature the Rocket appears and signals like any car or van would providing a very high level of visibility and hence safety.

All in all – the Rocket is a game changer in cargo bike design:- a stunningly beautiful alternative to the 'normal' cargo bike look but highly practical and positioned at the forefront of cycle safety. The Rocket is classified as pedal cycle and hence does not require road tax, insurance or a driver's licence. It can be parked or driven anywhere a bike is allowed to go.

But let's not forget the Rockets sheer head-turning ability – why not make your children's daily commute a trip to outer space!!!

Key features

- 7 speed derailleur and powerful 250W electric hub motor with hidden 13.4 Ah battery.
- 15mph maximum motor speed (by pedalling harder speed can be increased)
- ~120kg maximum cargo load (270kg max gross weight – rider – 60kg bike = load capability)
- 5 hour battery charge costs just 7 pence – Typical range of 15-25 miles
- Range can be extended by carrying more batteries or increased pedal assistance
- 4 x multipoint reclining children's seats with 5 point safety belts– folds flat to make a bed!
- Full safety light package as standard including forward and rear facing flashing indicators, hi/lo beam headlight, stop/tail light and a very loud horn. As a bonus a USB port is included!
- Cavernous front secure locker for storing school bags and helmets and included rain cover.

Optional extras

- Custom colour schemes and full 'wraps' for advertising your organisation
- Non road legal, high power motor kits available allowing up to four times the motor power of road legal version.
